

11 The Family Support Administration (FSA)

Issue/Problem

This National program area will be restructuring of the way public services are provided to help Americans in various areas that require federal, state, county, city, etc., tax-based funding.

The FSA proposal would streamline the functions of unemployment, welfare, housing, and any other subsidies that are currently administered in a somewhat uncoordinated manner. Again, we are already paying for the administration of these services.

This function will approach citizen needs for any publicly funded support as a “family unit” whether determining how to help one or x-number of persons.

The People’s Sense

America was originally peopled by brave souls seeking a better life for their family and/or religious freedom. The *family unit* whether it is comprised of one or more people is the fundamental element of any society.

When it comes to protecting the quality-of-life of American families, especially those in need we will adjust our social service support network of programs as needed to efficiently focus on improving their overall situations. In turn, we will expect their full commitment to the same goal if they want any tax-payer funded support. Not too much to ask.

The FSA entity will work in conjunction with the functions of the aforementioned Re-Employment System to assist people and families, but only so long as they are willing to work towards bettering their personal and/or their family situation with regard to employment, education, and civil responsibility.

The FSA may very well come to be known among the American public as, ***The Last Deal.***

We Americans as united people and as a nation born with a forgiving Christian character — will absolutely work to help those that want to help themselves progress. However, going forward we will show no tolerance for anyone that expects publicly funded support of any kind without the personal willingness to actively work on improving their educational level and/or vocational capabilities, as needed. They must also be prepared to work full or part-time while any publicly funded help is being provided to them and/or their family, as appropriate to their particular situation.

And for those that in their past were involved in crime, gangs, etc., we will diligently work to bring them into mainstream society with a “written understanding” signed of their own freewill that the nation will demonstrate zero tolerance for any future involvement in such activity. It very well could be their *Last Deal*, but we will offer it to them. This group will help to replace the IOs that will be repatriated!

The FSA program philosophy is for publicly funded services to provide a civil framework designed to help our citizens and their families progress toward a better life.

The intended focus of the Family Administration concept is to deliver a civilly responsible approach to “whole person” and “whole family” services. And to insure the most productive and efficient use of our tax dollars, as well. As stated before, it will be citizens first, Other Legal Occupants (OLOs) second, and there is no third.

We will absolutely help American citizens and their families when they need help and desire to build a better life.

At the same time, it will be made crystal clear that American society has the right, obligation, and responsibility to the Common Good to kick those that do not choose of their own freewill to be civilly responsible. And we will need to kick some of them very hard in the beginning! There will be no more pity parties and no more free rides.

The implementation of the FSA philosophy in the administration of publicly funded services working in conjunction with the U.S. Re-Employment System methodology will assuredly improve the quality of life within American society. It will do it one person and one family at a time.

There is not a lot more that really needs to be said about this proposal at this time since I believe you know, understand, and most likely approve of the common sense message above.
